In the Service of the Nation

A friend of mine, who was intensely religious, once asked me a Question, "If God Almighty were to appear before you and offer you two boons in place of all your wealth, what would you choose?" I pondered a while. Obviously, my choice of boons had to be powerful enough to re-build my capital. After much contemplation, I made my choice: ETERNAL ENTHUSIASM and PERSEVE ANCE. For these are the Qualities that made me what I am.

Experiential learning - Case studies and mini projects
Peer learning - Discussion forum moderated by the faculty to enable fruitful discussion on the topic under study.
Digital library access
Hands-on training on the latest cutting-edge technologies and digital facilities
MOOCs enabled Curriculum
Distinguished Alumni contributing to connect Academics to actual application to industry.

Pedagogy: Blended Learning in Flipped Classroom Model

The philosophy of Blended Learning is to combine educational practice of digital learning tools with more traditional classroom face to face teaching. **The flipped classroom model** is a similar program that aims to utilise technology in order to rearrange the learning experience and maximise the effectiveness of valuable face to face time in the classroom. In a flipped classroom programme, students are encouraged to access digital learning materials via a cloud-based learning platform during their own time.

Blended Learning is not a mere mix of online and face-to-face mode, but it refers to a well-planned combination of meaningful activities in both the modes.

The blend demands consideration of several factors, mainly focussing on learning outcomes and the **learner centred instructional environment.**

The teaching learning process of the programmes offered by CODE follow **Blended Learning Process** in which Online Asynchronous learning is facilitated by prerecorded Videos and Synchronous learning is by live online sessions.

Practical learning through case studies and webinars with the experts of Corporate World.

Four Quadrant Approach is followed:

The four quadrants are:

Quadrant-I	e-Tutorial containing pre-recorded Video and Audio Content in an organized form.
Quadrant-II	e-Content with self-instructional material (digital Self Learning Material), e-Books etc.
Quadrant-III	Discussion forum for raising of doubts and clarifying the same on real time basis and online sessions.
Quadrant-IV	Assessment.

Medium:

Medium of Instruction is English for all courses, assignments, presentations, webinars and internal Assessment and Examinations

Mandatory Requirements for the learners:

To derive the maximum benefit of the online sessions and digital learning tools, and to learn effectively access to good internet connection and electronic device(s), a laptop / desk top / mobile device will be a key requirement.
